Reference verification record

RAMBHA-LP Independent Study report

19 October 2026

Each reference in the report was checked against its DOI record in Crossref (api.crossref.org) and against the publisher's page or an open copy of the paper. The table lists the source used for each check. Each statement the report cites was also checked against the paper's text.

#	Reference	DOI	Checked against	What the report uses it for
1	Andersson et al. 2015, Space Sci. Rev. 195, 173–198	10.1007/s11214-015-0194-3	Crossref; Springer page; LASP PDF (Table 7)	MAVEN LPW temperature accuracy: 20% / 40% absolute
2	Ergun et al. 2015, GRL 42(21), 8846–8853	10.1002/2015GL065280	Crossref; LASP PDF	MAVEN temperatures "better than 20% accuracy in most conditions"
3	ISRO PRADAN, Chandrayaan-3 archive	n/a (web archive)	pradan.issdc.gov.in/ch3 page lists RAMBHA-LP	Data source
4	Johansson et al. 2017, MNRAS 469(Suppl. 2), S626–S635	10.1093/mnras/stx2369	Crossref; OUP page; arXiv 1709.03874	Photoemission removal method used by the instrument team
5	Liu et al. 2023, JGR Space Physics	10.1029/2022JA030835	Crossref; Europe PMC full text	Fixed exponent β = 0.5 gives

#	Reference	DOI	Checked against	What the report uses it for
	128(2), e2022JA030835		(PMC10078120)	densities about 3× too high; β of 0.75–1 found
6	Lomidze et al. 2018, Radio Science 53(1), 15–36	10.1002/2017RS006415	Crossref; Wiley page	Swarm overestimates electron temperature by about 400 K compared with radar
7	Manju et al. 2025, MNRAS 542(4), 2647–2656	10.1093/mnras/staf1276	Crossref; OUP page; ADS	Published ranges: 380–600 cm^{-3}, 3,000–8,000 K
8	Manju et al. 2026, MNRAS 546(4), stag077	10.1093/mnras/stag077	Crossref; OUP page; local copy of the PDF	Hop: 478 → 26 → 1,100 cm^{-3}; −3.9 V on 2 Sep
9	Mott-Smith & Langmuir 1926, Phys. Rev. 28(4), 727–763	10.1103/PhysRev.28.727	Crossref; APS page	Orbital-motion-limited probe theory
10	Ranvier & Lebreton 2023, GIMDS 12(1), 1–13	10.5194/gi-12-1-2023	Crossref; Copernicus page	The sheath exponent must be computed for each I–V curve (γ = 0.69 measured)

Corrections made during the check

- The 2025 paper had been cited as “Ambili et al.” Its first author is G. Manju, so the citation was corrected.
- The Johansson et al. page range was corrected from “S62” to S626–S635.
- References 2, 5, 6 and 10 were added. They support statements the report made without a citation.
- A claim about a MAVEN “±82 K” figure could not be found in the cited paper’s text, so it was removed. It was replaced with a statement quoted from Ergun et al. (2015).
- Every reference in the list is now cited in the text, and every citation in the text appears in the list.
